

1. TITLE OF THE CERTIFICATE (DE)⁽¹⁾**Lehrabschlussprüfungszeugnis Mechatronik – Medizingerätetechnik**⁽¹⁾ in original language**2. TRANSLATED TITLE OF THE CERTIFICATE (EN)⁽²⁾****Certificate of Apprenticeship “Mechatronics specialising in Medical Equipment Engineering” (f/m)**⁽²⁾ This translation has no legal status.**3. PROFILE OF SKILLS AND COMPETENCES**

Basic and main module:

- installation, commissioning and testing of devices and systems applied in medical equipment engineering, particularly on electronic and electromechanical medical equipment for laboratory use and research, for X-ray, nuclear and electromedicine, for rehabilitation technology, surgery and dental technology
- systematic search, localisation and elimination of faults, defects and malfunctions on devices and systems applied in medical equipment engineering
- maintenance and servicing of devices and systems applied in medical equipment engineering
- programming of devices and systems applied in medical equipment engineering
- performance of periodic safety checks and metrological monitoring checks according to the Medical Devices Operator Ordinance (Medizinprodukteverordnung, MPBV), Federal Law Gazette II No. 70/2007, and their documentation
- instruction, provision of information and advisory services to customers about devices and systems applied in medical equipment engineering (advisor on medical devices)
- performance of the work taking into consideration relevant quality, safety and environmental standards
- appropriate written and oral command of language and specialist terminology as well as use of job-related foreign language

Training in the following special module can be attended in addition to the basic and main module, with the aim of acquiring more in-depth know-how and specialisation.

Special module Robotics:

- programming of robots
- installation, configuration, commissioning, testing and documentation of robots and mobile robotic systems and their peripheral facilities
- systematic search, localisation and elimination of faults, defects and malfunctions on robots and mobile robotic systems and their peripheral facilities
- maintenance and servicing of robots and mobile robotic systems and their peripheral facilities
- optimisation as well as implementation of adjustments and changes to robots and mobile robotic systems and their peripheral facilities
- provision of advisory services to customers on issues related to the use and operation of robots

Special module PLC Technology:

- planning of the structured programming of programs for programmable logic controllers (PLCs) independent of the controller type
- advanced programming according to IEC 61131-3 in all of the following programming languages: IL and ST as well as LD, FBD and SFC
- systematic search, localisation and elimination of faults, defects and malfunctions of PLC programs
- programming of alternative programming systems
- optimisation as well as implementation of adjustments and changes to PLC programs based on the special requirements of their application
- provision of advisory services to customers on issues related to PLC programming and optimisation

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE ⁽³⁾

Range of occupations:

Employment including in industrial and craft businesses in the field of medical equipment engineering

⁽³⁾ if applicable

(*) Explanatory note

This document has been developed with a view to providing additional information on individual certificates; it has no legal effect in its own right. These explanatory notes refer to the Council Resolution no. 2241/2004/EG of the European parliament and the Council of 15 December 2004 on a single Community framework for the transparency of qualifications and competences (Europass).

Any section of these notes which the issuing authorities consider irrelevant may remain blank.

More information on transparency is available at: <http://europass.cedefop.europa.eu> or www.europass.at

5. OFFICIAL BASIS OF THE CERTIFICATE

Name and status of the body awarding the certificate Lehrlingsstelle der Wirtschaftskammer (Apprenticeship Office of the Economic Chamber; for the address, see certificate)	Name and status of the national/regional authority providing accreditation/recognition of the certificate Bundesministerium für Digitalisierung und Wirtschaftsstandort (Federal Ministry for Digital and Economic Affairs)
Level of the certificate (national or international) NQF/EQF 4 ISCED 35	Grading scale / Pass requirements Overall performance: Pass with Distinction Good Pass Pass Fail
Access to next level of education/training Access to the <i>Berufsreifeprüfung</i> (i.e. certificate providing university access for skilled workers) or a vocational college for people under employment. Access to relevant courses at a <i>Fachhochschule</i> (i.e. university level study programme of at least three years' duration with vocational-technical orientation); additional examinations must be taken if the educational objective of the respective course requires it.	International agreements Between Germany, Hungary, South Tyrol and Austria, international agreements on the mutual automatic recognition of apprenticeship-leave examinations and other vocational qualifications have been concluded. Information on equivalent apprenticeship occupations can be obtained from the Federal Ministry for Digital and Economic Affairs.
Legal basis 1. Training Regulation for Mechatronics BGBl. II (Federal Law Gazette) No. 196/2019 (company-based training) 2. Curriculum framework (education at the vocational school for apprentices) 3. The present apprenticeship trade replaces the apprenticeship trade Mechatronics (Training Regulation and Examination Regulation BGBl. II [Federal Law Gazette] No. 120/2015), which expired as of 31.07.2019.	

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

1. Training in the framework of the given Training Regulation for Mechatronics and of the curriculum of the vocational school for apprentices. Admission to the final apprenticeship examination upon completion of the apprenticeship period specified for the apprenticeship trade concerned. The final apprenticeship examination aims to establish whether the apprentice has acquired the skills and competences required for the respective apprenticeship trade and is able to carry out the activities particular to the learned trade herself/himself in an appropriate manner.
2. Admission to the final apprenticeship examination in accordance with Article 23 (5) of the *Berufsausbildungsgesetz* (Vocational Training Act). An applicant for an examination is entitled to sit the final apprenticeship examination without completing a formal apprenticeship training if she/he has reached 18 years of age and is able to prove acquisition of the required skills and competences by means of a relevant practical or an on-the-job training activity of appropriate length, by attending relevant courses etc.

Additional information:

Entry requirements: successful completion of 9 years of compulsory schooling

Duration of training: Basic module and main module: 3.5 years; basic module, main module and special module: 4 years

Enterprise-based training: Enterprise-based training comprises $\frac{4}{5}$ of the entire duration of the training and focuses

on the provision of job-specific skills and competences according to Article 2 of the Training Regulation, BGBl. II (Federal Law Gazette) No. 196/2019, enabling the apprentice to exercise qualified activities as defined by the profile of skills and competences specified above.

Education at vocational school: School-based education comprises $\frac{1}{5}$ of the entire duration of the training. The vocational school for apprentices has the tasks of imparting to apprentices the basic theoretical knowledge, of supplementing their enterprise-based training and of widening their general education in the framework of subject-oriented part-time instruction.
